SUMMARY

I am a Bachelor of Information Technology graduate with a strong academic background, including Dean's List honors and the Vice Chancellor's Award. Currently working as a Software Engineer at LLL Inc, I specialize in developing CRM systems, API integrations, and managing web hosting and domains. I am passionate about problem-solving and innovation, and eager to contribute to impactful technological solutions.

EDUCATION

UNIVERSITI TEKNOLOGI MARA (UiTM) Perlis
Bachelor of Information Technology with Honours, CGPA 3.64 Mar 2022 – Jun 2024

UNIVERSITI TECNOLOGI MARA (UiTM) Kedah
Diploma in Computer Science, CGPA 3.83 Aug 2019 - Feb 2022

WORK EXPERIENCE

LLL INC. Puchong, Selangor
Software Engineer January 2025 – Present
Software house providing development services for multiple client projects across different industries.

- Develop and maintain backend features for e-commerce and learning platform systems using the Laravel framework, ensuring the platforms meet evolving client requirements.
- Design and integrate RESTful APIs to support frontend applications and third-party services, improving system connectivity and data flow.
- Work with WordPress to integrate content management features with backend services and contribute to projects involving NestJS and Next.js, assisting in API development and frontend integration.
- Use GitHub for version control and collaboration, supporting a structured development workflow.
- Assist with Docker-based development environments and basic AWS deployment tasks, helping maintain stable and scalable systems.

HORUZ TECHNOLOGY SDN BHD Cyberjaya, Selangor
Back-end Developer October 2024 – January 2025

- Led the development of new CRM systems tailored to client needs, using Laravel to build robust back-end functionality. Integrated third-party APIs for seamless data retrieval and insertion, ensuring smooth communication between systems.
- Configured and hosted web systems on NetShop servers, ensuring high availability and performance. Implemented automated deployment workflows using GitHub Deployer to streamline the CI/CD pipeline. Managed domain configurations and DNS settings using GoDaddy to ensure proper routing and domain connectivity for live systems.
- Worked closely with the front-end team to translate Figma designs into responsive, user-friendly code. Contributed to creating mobile-optimized interfaces, ensuring an intuitive user experience across devices.

AZOR INDUSTRIES SDN BHD Petaling Jaya, Selangor
Software Engineer Intern → Freelance Programmer (Part-time) Mar 2024 – Sep 2024

- Developed and maintained a web-based e-ticket platform using the Laravel framework, supporting multiple user roles including promoter, organizer, customer, and admin.
- Implemented new platform features based on organizer and business requirements to improve usability and system functionality.
- Optimized SQL queries to improve system performance and reduce page loading times.

BLUEVY PLT Kuala Lumpur
Php Developer Intern Sep 2021 - Jan 2022

- Updated and transformed the existing system by migrating from Laravel blade files to Vue.js, ensuring a more modern and efficient frontend architecture.
- Applied effective debugging techniques to identify and rectify issues within the Vue.js codebase, optimizing the system's performance and user experience.
- Added missing functionalities and integrated essential plugins to enhance the overall capabilities of the system, addressing gaps in functionality and improving user satisfaction

ACHIEVEMENTS

- Vice Chancellor's Award (ANC) Recipient - Degree with CGPA of 3.64 (2024)
- Dean's List for Semesters 3 through 5 during my degree program (2022-2023)
- Vice Chancellor's Award (ANC) Recipient - Diploma with CGPA of 3.83 (2022)
- Dean's List for all semesters, totaling four semesters during my diploma (2019-2022)

PROJECTS INVOLVEMENT

E-Commerce Platform Development (LLL Inc.)

- Description: Contributed to the development and maintenance of an **e-commerce platform targeting the Japan market**, designed to manage product listings, orders, and customer interactions while integrating with external services.
- Technologies Used: Laravel, PHP, REST API, MySQL, JavaScript, WordPress, GitHub, Docker, AWS
- Features:
    - API Development: Built and maintained RESTful APIs to support product data, order management, and frontend integration.
    - WordPress Integration: Integrated backend services with WordPress to manage product content and marketing pages.
    - System Maintenance & Feature Enhancement: Implemented new features and improvements based on client requirements to support business operations.
    - Version Control & Collaboration: Used GitHub for source control, code collaboration, and structured development workflows.
- Impact: Helped improve system reliability and supported ongoing feature development, enabling the platform to handle daily business operations more efficiently.

CRM SYSTEM DEVELOPMENT (Horuz Technology)

- Description: A custom CRM system designed to manage client relationships and integrate with third-party systems.
- Technologies Used: Laravel, PHP, JavaScript, API Integrations, MySQL, GitHub Actions, NetShop Hosting, GoDaddy.
- Features:
    - Third-Party API Integration: Seamlessly retrieves and inserts data from external systems to keep the CRM update.
    - User-Centric Design: Supports various user roles (admin, client, etc.) for managing and accessing relevant data.
    - Automated Deployment and Hosting: Utilizes GitHub Deployer for automatic deployment and hosting on NetShop servers, ensuring system uptime and stability.
    - Domain and DNS Management: Manages domain configurations and DNS settings via GoDaddy to ensure proper connectivity and system access.
- Impact: The CRM system improves efficiency, simplifies data management, and enhances user experience.

SMASHON - BADMINTON BUDDY APP FOR BADMINTON ENTHUSIASTS (Final Year Project - Semester 6)

- Description: A mobile app designed to enhance the badminton experience with features for court reservations and community.
- Technologies Used: Flutter framework, Firebase, Gmail integration, Restful API, MySQL, PHP.
- Features:
    - Court Booking: Allows users to reserve badminton courts easily with chat system
    - User Authentication: Secures sign-in with Gmail integration.
    - QR Code Entrance Pass: Provides contactless facility access via QR code system.
- Impact: The app has become a popular choice for Android users seeking hassle-free court reservations and community engagement.

ADDITIONAL INFORMATION

Soft Skills: Decision Making, Communication, Multi-tasking, Adaptability, Time Management
Technical Skills: Proficient in Laravel, CodeIgniter 4, Bootstrap, REST API, Ajax, HTML, CSS, Java, Oracle, JavaScript, PHP & MySQL, GitLab, GitHub, and Figma. Intermediate skills in Flutter, Vue.js, CI/CD, Setup Server, Domain, Python, Docker, AWS, WordPress and C++.
Languages: Malay (Native), English (Proficiency)
